

PRECITEX **XP** SERIES APRON FOR **EXTENDED** PERFORMANCE

PRECITEX **XP Series** Aprons are premium quality products that last almost 25% longer than regular aprons. As part of our constant endeavour and commitment to bring you world-class products that enhance your productivity and profitability, PRECITEX **XP Series** Aprons are a result of PRECITEX state of the art R & D programme. They are the best in their class and offer you unparalleled advantages in spinning.

Features

- ✓ The unique polymer blend used in the outer layer provides excellent fibre control characteristics.
- ✓ The superior formulation offer outstanding ozone resistance and abrasion resistance of the outer layer of the apron.
- ✓ Modern manufacturing process together with better compounding techniques make the apron more supple and impart good flexing properties.

How do the **KEY PROPERTIES** of PRECITEX **XP** Apron work to your advantage?

*Increased resistance to **Ozone Crack** and **Abrasion** impart longer life to the apron.

*Enhanced **Elongation** properties add flexibility and improves the working of the apron.

*Improved **Compression Set** provides it better dimensional stability, as well as life.

Thus, you get almost 25% longer apron life and consistent yarn quality.

XP apron in comparison with other types after exposure to Ozone of very high concentration :-

Regular Apron Type A

Regular Apron Type B
